Projects

PlaceTrex, Placement Management System

- This project was developed to ease the placement process.
- This project helps to manage student registrations, company details, and placement records efficiently.
- Technologies Used: HTML, CSS, PHP, MySQL, JavaScript.

MentorConnect, Mentor Management System

- A web-based platform for students to connect with mentors.
- It allows mentors to upload documents where the mentee or student can view those documents and give feedback based on that.
- Technologies Used: React JS, HTML, CSS, MySQL.

CycleRetail, Cycle Management System

- This project allows employers in cycle shops to place orders based on customer requirements.
- This includes Admin and Employer modules, where the Employer is responsible for taking orders, and the Admin handles restocking and sales management.
- Technologies Used: Angular, .NET, SCSS, Bootstrap, TypeScript, HTML, PostgreSQL.
